

UNITED STATES DEPARTMENT OF THE INTERIOR  
Bureau of Land Management  
P. O. Box 36800  
Billings, Montana 59107

**OIL AND GAS LEASE STIPULATIONS**

**ESTHETICS**--To maintain esthetic values, all surface-disturbing activities, semipermanent and permanent facilities may require special design including location, painting and camouflage to blend with the natural surroundings and meet the intent of the visual quality objectives of the Federal Surface Managing Agency (SMA).

**EROSION CONTROL**--Surface-disturbing activities may be prohibited during muddy and/or wet soil periods.

**CONTROLLED OR LIMITED SURFACE USE STIPULATION** --This stipulation may be modified, consistent with land use documents, when specifically approved in writing by the Bureau of Land Management (BLM) with concurrence of the SMA. Distances and/or time periods may be made less restrictive depending on the actual onground conditions. The prospective lessee should contact the SMA for more specific locations and information regarding the restrictive nature of this stipulation.

The lessee/operator is given notice that the lands within this lease may include special areas and that such areas may contain special values, may be needed for special purposes, or may require special attention to prevent damage to surface and/or other resources. Possible special areas are identified below. Any surface use or occupancy within such special areas will be strictly controlled, or **if absolutely necessary**, excluded. Use or occupancy will be restricted only when the BLM and/or the SMA demonstrates the restriction necessary for the protection of such special areas and existing or planned uses. Appropriate modifications to imposed restrictions will be made for the maintenance and operations of producing oil and gas wells.

After the SMA has been advised of specific proposed surface use or occupancy on the leased lands, and on request of the lessee/operator, the Agency will furnish further data on any special areas which may include:

100 feet from the edge of the rights-of-way from highways, designated county roads and appropriate federally-owned or controlled roads and recreation trails.

500 feet, or when necessary, within the 25-year flood plain from reservoirs, lakes, and ponds and intermittent, ephemeral or small perennial streams: 1,000 feet, or when necessary, within the 100-year flood plain from larger perennial streams, rivers, and domestic water supplies.

500 feet from grouse strutting grounds. Special care to avoid nesting areas associated with strutting grounds will be necessary during the period from March 1, to June 30. One-fourth mile from identified essential habitat of state and federal sensitive species. Crucial wildlife winter ranges during the period from December 1 to May 15, and in elk calving areas during the period from May 1 to June 30.

300 feet from occupied buildings, developed recreational areas, undeveloped recreational areas receiving concentrated public use and sites eligible for or designated as National Register sites.

Seasonal road closures, roads for special uses, specified roads during heavy traffic periods and on areas having restrictive off-road vehicle designations.

On slopes over 30 percent or 20 percent on extremely erodable or slumping soils.

Standard(September 1998)

**See Notice on Back**

**NOTICE**

**APPLICATIONS FOR PERMIT TO DRILL (APDs)**--The BLM district or resource area offices are responsible for the receipt, processing, and approval of APDs. The APDs are to be submitted by oil and gas operators pursuant to the requirements found in Onshore Oil and Gas Order No. 1 -- Approval of Operations on Onshore Federal and Indian Oil and Gas Leases (Circular No. 2538). Additional requirements for the conduct of oil and gas operations on federal oil and gas leases can be found in Code of Federal Regulations Title 43, Part 3160. Copies of Onshore Oil and Gas Order No. 1, and pertinent regulations, can be obtained from the BLM district offices in which the operations are proposed. Early coordination with these offices on proposals is encouraged.

**CULTURAL AND PALEONTOLOGICAL RESOURCES**--The SMA is responsible for assuring that the leased lands are examined to determine if cultural resources are present and to specify mitigation measures. Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator, unless notified to the contrary by the SMA, shall:

1. Contact the appropriate SMA to determine if a site-specific cultural resource inventory is required. If an inventory is required, then:
2. Engage the services of a cultural resource specialist acceptable to the SMA to conduct a cultural resource inventory of the area of proposed surface disturbance. The operator may elect to inventory an area larger than the area of proposed disturbance to cover possible site relocation which may result from environmental or other considerations. An acceptable inventory report is to be submitted to the SMA for review and approval no later than that time when an otherwise complete application for approval of drilling or subsequent surface-disturbing operation is submitted.
3. Implement mitigation measures required by the SMA. Mitigation may include the relocation of proposed lease-related activities or other protective measures such as testing salvage and recordation. Where impacts to cultural resources cannot be mitigated to the satisfaction of the SMA, surface occupancy on that area must be prohibited.

The lessee or operator shall immediately bring to the attention of the SMA any cultural or paleontological resources discovered as a result of approved operations under this lease, and not disturb such discoveries until directed to proceed by the SMA.

**ENDANGERED OR THREATENED SPECIES**--The SMA is responsible for assuring that the leased land is examined prior to undertaking any surface-disturbing activities to determine effects upon any plant or animal species, listed or proposed for listing as endangered or threatened, or their habitats. The findings of this examination may result in some restrictions to the operator's plans or even disallow use and occupancy that would be in violation of the Endangered Species Act of 1973 by detrimentally affecting endangered or threatened species or their habitats.

The lessee/operator may, unless notified by the authorized officer of the SMA that the examination is not necessary, conduct the examination on the leased lands at his discretion and cost. This examination must be done by or under the supervision of a qualified resources specialist approved by the SMA. An acceptable report must be provided to the SMA identifying the anticipated effects of a proposed action on endangered or threatened species or their habitats.

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**NO SURFACE OCCUPANCY STIPULATION**

Serial No.

Surface occupancy and use is prohibited within sites or areas designated for conservation use, public use, or sociocultural use.

On the lands described below:

NESE, Sec. 15, T.16N., R.11E., PMM, Judith Basin County, Montana.

For the purpose of:

To protect those cultural properties identified for conservation use, public use, and sociocultural use. (see definitions for use categories within BLM Manual 3111).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

NSO (September 1998)

**11-00-8**

**STIPULATIONS FOR OIL AND GAS LEASE**  
**AT TRACT BV CABLELINE, LOCATED IN**  
**TOWNSHIP 17 NORTH, RANGE 11 EAST, P.M.M.,**  
**SECTION 1, JUDITH BASIN COUNTY, MONTANA**

1. Notification must be given to the following offices at least 15 days prior to initiation of any exploration within the missile complex area:

341 CES/CERR  
39 78<sup>th</sup> Street North  
Malmstrom AFB MT 59402

341 SW/CC  
39 78<sup>th</sup> Street North  
Malmstrom AFB MT 59402

In addition, a minimum of 72 hours (excluding weekends and holidays) notification must be given to the following office when work will be done in the vicinity of the cable right of way:

Cable Affairs Office  
341 CS/SCMI  
21 77<sup>th</sup> Street North  
Malmstrom AFB MT 59402

If required, Malmstrom AFB will identify and stake the cable line.

2. Prior to any seismographic exploration including explosive charges, give notification of intent and location of charges so adequate review and necessary security measures may be taken by the Air Force. This notification should be provided at least ten days prior to setting any charges.

3. Any seismographic or drilling operation may be subject to possible evacuation of personnel in the event of any incident, real or exercise, on this facility.

4. Prior to lessee installing any cathodic protection for any purpose, permission must be obtained from the Air Force. The potential exists for lessee's cathodic protection to interfere with USAF cathodic protection on the site. USAF reserves the right to refuse permission, or, if permission is granted, to have the lessee remove, at lessee's expense, any cathodic protection which interferes with Air Force's on-site protection. If permission is granted, notification of installation must be provided to 341 CES/CEOIEC and 341 CES/CEM at 39 78<sup>th</sup> Street North, Malmstrom AFB, MT 59402.

5. Lessee will be pecuniary liable to the United States Air Force for any and all damages resulting from the lessee's activities.

6. Severance and/or disturbance of the missile cable would likely cause a catastrophic failure. The lessee will follow the rules listed below for exploration in any land area where missile cables are located:

COE

11-00-9

- a. Blasting, drilling, and/or excavation will be positively controlled to ensure cable segments are not disturbed in any way. The cable right of way is clearly marked.
- b. Drilling and/or excavation will not be conducted within 150 feet of any buried cable segment.
- c. Vehicles and equipment will be kept out of the 16-1/2 foot permanent right of way easement.
- d. Since Malmstrom AFB is responsible for the maintenance, restoration and repair of the missile cable system, right of way gates, marker posts and the 16-1/2 foot permanent easement along the cable right of way, the lessee will be pecuniary liable to the United States Air Force for any and all damages resulting from the lessee's activities.
- e. In the event the cableline requires relocating or lowering to accommodate the pipelines, sump basins or other facilities, predeposited reimbursement of costs will be required. The Air Force will not perform any work until such sum has been predeposited.

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 5 N, R 41 E, PMM  
sec. 14: All

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 7 N, R 41 E, PMM  
sec. 10: All  
26: N2

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 7 N, R 41 E, PMM  
sec. 26: N2

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 10 N, R 41 E, PMM  
sec. 4: Lots 1,2,3,4  
4: S2N2,S2  
6: Lots 1-7  
6: S2NE,SENW,E2SW,SE  
8: All

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-25**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 10 N, R 41 E, PMM  
sec. 6: Lots 1-7  
6: S2NE, SENW, E2SW, W2SE  
8: SW

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-25**

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 9 N, R 42 E, PMM  
sec. 2: Lot 1

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-41**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 9 N, R 42 E, PMM  
sec. 2: Lots 1,2,3,4  
2: S2N2,S2  
12: All  
14: NE,N2SE,SESE

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-41**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 9 N, R 42 E, PMM  
sec. 6: Lots 1,2  
6: S2NE, SE  
18: Lots 1,2,3,4  
18: E2, E2W2

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 8 N, R 43 E, PMM  
sec. 4: Lots 1,2,3,4  
4: S2N2,S2  
6: SESW,SE  
8: N2N2,SWNW,NWSW,SESE  
18: E2

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-56**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 8 N, R 43 E, PMM  
sec. 4: Lots 1, 2, 3, 4  
4: S2N2, S2  
6: Lots 1-7  
6: S2NE, SENW, E2SW, SE  
8: N2N2, SWNW, E2SE  
18: E2

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullying, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 1 N, R 48 E, PMM  
sec. 12: N2  
T 1 N, R 49 E, PMM  
sec. 6: Lots 3-7, SENE, E2SW

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

All surface-disturbing activities, semi-permanent and permanent facilities in VRM Class II, areas may require special design, including location, painting, and camouflage, to blend with the natural surroundings and meet the visual quality objectives for the area.

On the lands described below:

T 2 N R 49 E, PMM  
sec. 24: SWNE, SENW, SW, S2SE

For the purpose of:

To control the visual impacts of activities and facilities within acceptable levels.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

Sec. 28: NENE, E2SE

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-80**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 3 N, R 51 E, PMM  
sec. 30: Lots 1,2,3,4  
30: E2,E2W2

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-81**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance, a surface use plan of operations (SUPO) for oil and gas activities must be approved for black-footed ferret reintroduction areas by the authorized officer in consultation with the U.S. Fish and Wildlife Service (USFWS).

On the lands described below:

T 2 N, R 50 E, PMM  
  sec. 12: Lots 3,4  
          12: W2NE,NW  
T 2 N, R 51 E, PMM  
  sec. 4: Lots 1,4  
          4: SENE  
          6: Lots 1-7  
          6: SWNE, SENW, E2SW, NWSE, S2SE  
T 3 N, R 51 E, PMM  
  sec. 20: All  
          30: Lots 1,2,3,4  
          30: E2,E2W2  
          32: NE

For the purpose of:

To protect designated black-footed ferret reintroduction habitat areas.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-81**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 3 N, R 51 E, PMM  
Sec. 20: ALL  
30: LOTS 1,2,3,4  
30: E2,E2W2  
32: NE

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-81**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

All surface-disturbing activities, semi-permanent and permanent facilities in VRM Class II, areas may require special design, including location, painting, and camouflage, to blend with the natural surroundings and meet the visual quality objectives for the area.

On the lands described below:

T 2 N, R 50 E, PMM  
sec. 18: Lots 1,2,3,4  
18: SESW,NESE,S2SE  
20: S2  
30: Lots 1,2,3,4  
30: E2W2

For the purpose of:

To control the visual impacts of activities and facilities within acceptable levels.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-82**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 2 N, R 50 E, PMM  
Sec. 18: LOTS 1,2,3,4  
18: SESW, NESE, S2SE  
20: S2  
30: LOTS 1,2,3,4  
30: E2W2

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

12: Lots 1,2,3,4  
12: W2E2,W2

For the purpose of:

To control the visual impacts of activities and facilities within acceptable levels.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-85**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 3 N, R 50 E, PMM  
sec. 2: Lots 1,2,3,4  
2: S2N2,S2  
4: Lots 1,2,3,4  
4: S2N2,S2  
10: E2  
12: W2

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-85**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**NO SURFACE OCCUPANCY STIPULATION**

Serial No.

Surface occupancy and use is prohibited within 1/4 mile of grouse leks.

On the lands described below:

T 3 N, R 50 E, PMM  
sec. 10: SWNE, W2SE

For the purpose of:

To protect sharptail and sage grouse lek sites necessary for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-92**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**NO SURFACE OCCUPANCY STIPULATION**

Serial No.

Surface occupancy and use is prohibited within riparian areas, 100-year flood plains of major rivers, and on water bodies and streams.

On the lands described below:

T 6 S, R 50 E, PMM  
sec. 1: Lot 1

For the purpose of:

To protect the unique biological and hydrological features associated with riparian areas, 100-year flood plains of major rivers, and water bodies and streams.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

NSO (September 1998)

**11-00-94**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

All surface-disturbing activities, semi-permanent and permanent facilities in VRM Class II, areas may require special design, including location, painting, and camouflage, to blend with the natural surroundings and meet the visual quality objectives for the area.

On the lands described below:

T 6 S, R 50 E, PMM  
sec. 1: Lot 1  
2: S2SW  
3: Lot 4  
3: SWNE, S2NW, SW, W2SE, SESE  
9: All  
10: N2, N2SW  
11: N2NW, SWNW

For the purpose of:

To control the visual impacts of activities and facilities within acceptable levels.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-94**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 6 S, R 50 E, PMM  
sec. 3: SW,SWSE  
9: All  
10: N2,N2SW

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance, prairie dog colonies and complexes 80 acres or more in size will be examined to determine the absence or presence of black-footed ferrets. The findings of this examination may result in some restrictions to the operator's plans or may even preclude use and occupancy that would be in violation of the Endangered Species Act (ESA) of 1973.

The lessee or operator may, at their own option, conduct an examination on the leased lands to determine if black-footed ferrets are present, or if the proposed activity will have an adverse effect, or if the area can be cleared. This examination must be done by or under the supervision of a qualified resource specialist approved by the Surface Management Agency (SMA).

An acceptable report must be provided to the SMA documenting the presence or absence of black-footed ferrets and identifying the anticipated effects of the proposed action on the black-footed ferret and its habitat. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 6 S, R 51 E, PMM  
sec. 20: SWNE, SWNW, NESW, NWSE

For the purpose of:

To assure compliance with the Endangered Species Act (ESA) by locating and protecting black-footed ferrets and their habitat.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-105**

United States Department of the Interior  
Bureau of Land Management

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range

for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 6 S, R 51 E, PMM  
Sec. 20: ALL  
21: ALL

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 2 S, R 53 E, PMM  
sec. 4: Lots 7,8,9,11  
4: SESW,E2SE  
10: All

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-117**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 6 S, R 53 E, PMM  
Sec. 15: ALL  
22: ALL  
23: ALL

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-118**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 6 S, R 53 E, PMM  
sec. 30: Lots 1,2,3,4  
30: E2, E2W2

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-119**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance, prairie dog colonies and complexes 80 acres or more in size will be examined to determine the absence or presence of black-footed ferrets. The findings of this examination may result in some restrictions to the operator's plans or may even preclude use and occupancy that would be in violation of the Endangered Species Act (ESA) of 1973.

The lessee or operator may, at their own option, conduct an examination on the leased lands to determine if black-footed ferrets are present, or if the proposed activity will have an adverse effect, or if the area can be cleared. This examination must be done by or under the supervision of a qualified resource specialist approved by the Surface Management Agency (SMA).

An acceptable report must be provided to the SMA documenting the presence or absence of black-footed ferrets and identifying the anticipated effects of the proposed action on the black-footed ferret and its habitat. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 6 S, R 53 E, PMM  
sec. 30: NE  
31: SENW, NESW

For the purpose of:

To assure compliance with the Endangered Species Act (ESA) by locating and protecting black-footed ferrets and their habitat.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

11-00-119

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 6 S, R 53 E, PMM  
Sec. 19: S2SE  
30: LOTS 1,2,3,4  
30: E2,E2W2  
31: LOTS 1,2,3,4  
31: E2W2

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-119**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 6 S, R 53 E, PMM  
Sec. 24: NWNW, S2NW, S2  
25: N2, NESW, N2SE, SESE

For the purpose of:

To protect sharp-tailed and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young, and to protect nesting activities adjacent to nesting sites for the long-term maintenance of sharp-tailed and sage grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

Prior to surface disturbance, prairie dog colonies and complexes 80 acres or more in size will be examined to determine the absence or presence of black-footed ferrets. The findings of this examination may result in some restrictions to the operator's plans or may even preclude use and occupancy that would be in violation of the Endangered Species Act (ESA) of 1973.

The lessee or operator may, at their own option, conduct an examination on the leased lands to determine if black-footed ferrets are present, or if the proposed activity will have an adverse effect, or if the area can be cleared. This examination must be done by or under the supervision of a qualified resource specialist approved by the Surface Management Agency (SMA).

An acceptable report must be provided to the SMA documenting the presence or absence of black-footed ferrets and identifying the anticipated effects of the proposed action on the black-footed ferret and its habitat. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 7 S, R 53 E, PMM  
sec. 15: S2NE, SENW, NESE

For the purpose of:

To assure compliance with the Endangered Species Act (ESA) by locating and protecting black-footed ferrets and their habitat.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-126**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 7 S, R 53 E, PMM  
sec. 15: N2, NESE  
21: All  
22: N2NE, NWNW, S2S2

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-126**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**NO SURFACE OCCUPANCY STIPULATION**

Serial No.

Surface occupancy and use is prohibited within 1/4 mile of grouse leks.

On the lands described below:

T 7 S, R 53 E, PMM  
sec. 17: SWNE, S2NW, N2SW, NWSE

For the purpose of:

To protect sharptail and sage grouse lek sites necessary for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

NSO (September 1998)

**11-00-127**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 7 S, R 53 E, PMM  
sec. 19: Lots 1,2,3,4, E2,E2W2  
20: All

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-135**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 7 S, R 54 E, PMM  
sec. 29: E2NE,NW,S2  
31: Lots 1,2,3,4  
31: E2,E2W2  
32: All

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

6: Lots 1-7, S2NE,SENE,E2SW,SE

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

**11-00-145**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 3 S, R 57 E, PMM  
sec. 4: Lots 1,2,3,4  
4: S2N2,S2  
5: Lot 1  
5: S2NE,NESW,S2SW,SE

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-145**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**NO SURFACE OCCUPANCY STIPULATION**

Serial No.

Surface occupancy and use is prohibited within 1/2 mile of known ferruginous hawk nest sites which have been active within the past 2 years.

On the lands described below:

T 3 S, R 57 E, PMM  
sec. 4: SWNW, SW  
5: S2NE, E2SW, SE

For the purpose of:

To maintain the production potential of ferruginous hawk nest sites, which are very sensitive to disturbance and have been identified as Category 2 species under the Endangered Species Act (ESA).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

NSO (September 1998)

**11-00-145**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**TIMING LIMITATION STIPULATION**

Serial No.

Surface use is prohibited from March 1 to August 1, within  $\frac{1}{2}$  mile of raptor nest sites which have been active within the past 2 years. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 3 N, R 57 E, PMM  
Sec. 4: Lots 1,2,3,4  
5: S2NE,NESW,S2SW,SE

For the purpose of:

To protect nest sites of raptors which have been identified as species of special concern in Montana, North or South Dakota.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-145**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 3 S, R 57 E, PMM  
sec. 7: Lots 1,2,3,4, E2,E2W2  
8: All  
9: All

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

32: NW,N2SW,SWSW

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

**11-00-154**

United States Department of the Interior  
Bureau of Land Management  
Montana State Office

**CONTROLLED SURFACE USE STIPULATION**

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 3 S, R 57 E, PMM  
sec. 34: N2  
35: All

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

Serial No.

Surface occupancy and use is prohibited within 1/4 mile of grouse leks.

On the lands described below:

T 14 N, R 4 E, BHM  
sec. 4: NESE

For the purpose of:

To protect sharptail and sage grouse lek sites necessary for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

NSO (September 1998)
